RESEARCH COMPLIANCE CERTIFICATION

Research activities involving the use of human subjects, vertebrate animals, and/or biohazards must be reviewed and approved by the appropriate Texas A&M University regulatory research committee (i.e., IRB, IACUC, IBC) before the activity can commence. This requirement applies to activities conducted at Texas A&M and to activities conducted at non-Texas A&M facilities or institutions. In both cases, students are responsible for working with the relevant Texas A&M research compliance program to ensure and document that all Texas A&M compliance obligations are met before the study begins.

I, __________________, certify that all research compliance requirements related to this Undergraduate Research Scholars thesis have been addressed with my Research Advisor prior to the collection of any data used in this final thesis submission.

For projects that required approval, list all protocol number(s):

IRB protocol number(s): ____________________________
IACUC protocol number(s): ____________________________
IBC protocol number(s): ____________________________

ABSTRACT

[Enter Your Title Here, Capitalizing the First Letter of Each Word as Needed, If Title Goes on Two or More Lines, Make Sure it Stays Single-spaced]

Name of Individual OR Team Member 1\textsuperscript{1}, Team Member 2\textsuperscript{2}…
Department of [Enter Individual’s Primary Department and Enter Secondary Department]
OR
Department of [Enter Team Member 1 Primary Department and Enter Secondary Department]\textsuperscript{1}
Department of [Enter Team Member 2 Primary Department and Enter Secondary Department]\textsuperscript{2}
Texas A&M University

Research Advisor: Dr. [Enter Your Primary Faculty Advisor’s Name]
Department of [Enter Your Primary Faculty Advisor’s Department]
Texas A&M University

Research Advisor: Dr. [Enter Your Secondary Faculty Advisor’s Name]
Department of [Enter Your Faculty Advisor’s Department]
Texas A&M University

Your Abstract must be a “complete snapshot” of your manuscript and be a stand-alone piece. Since the text of the Abstract will be distributed widely through a variety of databases, formal citations, images, and complex equations should not be included.

The Abstract should be between 250 and 500 words.

The Abstract is a stand-alone section that appears in public databases without your thesis document and should \textbf{not} contain citations.

This is the first page of your document that will use Arabic page numbers and should begin on page 1. The rest of the pages in your document should continue with these Arabic numbers, including your appendices.
DEDICATION (OPTIONAL)

The Dedication page:

• Is optional.

• Must be placed directly after the Abstract Page (page 1).

• Is limited to one page. Dedications are typically no more than a few sentences.

• Is the same font size and style as the other text in the thesis, however, your text can be centered and italics, if preferred.

• Is meant to dedicate your work to a person or group and:
  
  o Identifies the person or group (can be simple or use formal titles)

  o Varies in style from formal to informal

  o May include an explanation of why you chose the person or group
ACKNOWLEDGMENTS (REQUIRED)

The Acknowledgements page is required and must state whether or not you had contributors and/or funding. The Acknowledgements page can be 1-2 pages.

Contributors Section: Part 1 will name all faculty advisor(s). Part 2 will acknowledge individual student contributions and/or the contributions of others.

Funding Section: Include all support that was provided by the university, or any other source, to conduct your thesis, research, and compilation. If you received no funding, state that.

The wording below can be used as an example. You may be required to use specific language from your granting agency or fellowship program. Be sure to check your program guidelines and consult your faculty advisor when drafting this page.

[SAMPLE WORDING FOR CONTRIBUTORS SECTION]

Contributors

I would like to thank my faculty advisor, Dr. XXXX, and my [XXXX], [XXXX], for their guidance and support throughout the course of this research.

Thanks also go to my friends and colleagues and the department faculty and staff for making my time at Texas A&M University a great experience.

Finally, thanks to my [XXXX] for their encouragement and to my [XXXX] for her/his/their patience and love.

The [DATA/MATERIALS/etc.] analyzed/used for [MANUSCRIPT TITLE] were provided by [NAME – can be the names of other faculty, graduate students, lab, lab members, teammates, etc. who contributed to specific aspects of the project]. The analyses depicted in [MANUSCRIPT TITLE] were conducted in part by [NAME – can be the name of
a department, lab, research group, etc.] and were published in [YEAR] [OR and these data are unpublished].

All other work conducted for the thesis was completed by the student independently.

[Funding Sources]

Funding Sources

Undergraduate research was supported by [XXXX] at Texas A&M University and an additional research fellowship from [XXXX].

This work was also made possible in part by [FUNDING SOURCE] under Grant Number [INSERT GRANT NUMBER]. Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the [NAME OF AWARDING OFFICE].

NOTE: If you received no funding, state that here instead.

1. INTRODUCTION (REQUIRED)

This is the first major section of your document. The Introduction section can range from a few paragraphs to a few pages and can contain in-text citations if you wish. The purpose of this section is to tie your manuscripts together in a cohesive manner and demonstrate the overarching theme of your thesis.

The title must include the word INTRODUCTION, even if you’re doing the Journal Article document format. The section heading has the “Heading 1” style in the Styles menu.

1.1 Subheading 1 (optional – can add/remove as needed – place in Table of Contents if used)

Directly above is a first order subheading. If you feel that the information under a first order subheading needs to be split into more sections, use additional subheadings. Take note that all first order subheadings must be included in the Table of Contents. Second and third order subheadings are NOT be included in the Table of Contents.

1.1.1 Second order subheading (optional – DO NOT place in Table of Contents if used)

This information still pertains to your first order subheading. If you need to break up content even further, you can use one last level of subheadings, called third order subheadings.

1.1.1.1 Third order subheading (optional – DO NOT place in Table of Contents if used)

This information still pertains to your first order subheading, but is directly related to your second order subheading.
1.2 References (required if citations used in Introduction)

Discuss with your faculty advisor(s) which citation style is appropriate for your field. Use that style consistently throughout your thesis. All in-text citations used throughout your thesis must appear on the References page. For some citation styles, each entry is numbered, and each number corresponds with an in-text citation. Other citation styles do not require numbering.

Each reference entry must be single spaced and have a double-spaced line in between each entry (HINT: Single space this entire page and hit return twice in between each entry. If you are using a citation software that links to Word, you can also automate the formatting. Contact us if you need help.)

The references you list on this page are for in-text citations used in the Introduction only. Your individual manuscripts will have their own references subheadings. The References subheading is not required here if you do not have in-text citations in the Introduction section.
2. TITLE ASSOCIATED WITH FIRST JOURNAL MANUSCRIPT

(REQUIRED)

If the journal article you are including has already been published (or if it has been accepted for publication), then you’ll likely need to submit a copyright permission and add a citation within the text. To add the citation, you’ll need to add an asterisk at the end of the section title and then place the citation in a footnote at the bottom of this page.

2.1 Subheading 1

Undergraduate Research Scholars will own the copyright to the Undergraduate Research Scholars Thesis. This means that the original work in the thesis can still be submitted for publication in a scholarly journal. Because the OAKTrust Digital Repository is legally classified as a publication, care must be taken not to violate United States copyright laws. If an Undergraduate Research Scholars Thesis contains any material (pictures, figures, tables, text, etc.) taken from other copyrighted sources, the student and faculty advisor are responsible for determining if a letter of permission from the copyright holder should be included as a statement within the document or as supplemental material to allow its use in the thesis. This is true even if you are an author of the material. Ultimately, if a permission statement is required by the copyright holder, it must be included in the thesis and proper credit (dictated by the letter of permission) must be given in the text.

If you have already published material that you subsequently want to include as part of your Undergraduate Research Scholars Thesis, you should be aware of the agreement that you signed when the material was accepted for publication. At that time, you may have assigned copyright to someone else (a journal, for example) as publisher, and you may no longer possess
rights. Publisher agreement forms can be modified before they are signed so that you retain the right to include the material in your thesis. When negotiating with the publisher, remember to inform him/her that the thesis will be available worldwide through the Internet. If you have not retained the right to use the material in the thesis, written permission must be obtained from the copyright holder to include the material in the thesis. Proper credit, as instructed in the letter of permission, must be given in the text. A copy of the letter of permission should be included in a separate appendix in the thesis and an extra copy of the letter should be emailed to LAUNCH: UGR staff at ugr@tamu.edu.

Figure 1. Example of properly formatted figure and figure caption.

</table>

Note: Table notes or additional content can go here.

Be sure to reference all figures and tables in your body text within one page of where the figure/table appears.

2.2 References

Discuss with your faculty advisor(s) which citation style is appropriate for your field. Use that style consistently throughout your thesis. All in-text citations used throughout your thesis
must appear on the References page. For some citation styles, each entry is numbered, and each number corresponds with an in-text citation. Other citation styles do not require numbering.

Each reference entry must be single spaced and have a double-spaced line in between each entry (HINT: Single space this entire page and hit return twice in between each entry. If you are using a citation software that links to Word, you can also automate the formatting. Contact us if you need help.)

The references you list on this page are for in-text citations used in this manuscript only.
3. TITLE ASSOCIATED WITH SECOND JOURNAL MANUSCRIPT

(OPTIONAL)

3.1 Subheading 1

Another paragraph starts here.

3.2 References

Discuss with your faculty advisor(s) which citation style is appropriate for your field. Use that style consistently throughout your thesis. All in-text citations used throughout your thesis must appear on the References page. For some citation styles, each entry is numbered, and each number corresponds with an in-text citation. Other citation styles do not require numbering.

Each reference entry must be single spaced and have a double-spaced line in between each entry (HINT: Single space this entire page and hit return twice in between each entry. If you are using a citation software that links to Word, you can also automate the formatting. Contact us if you need help.)

The references you list on this page are for in-text citations used in this manuscript only.
4. TITLE ASSOCIATED WITH THIRD JOURNAL MANUSCRIPT

(OPTIONAL)

4.1. Subheading 1 (optional, can add/remove as needed)

Another paragraph starts here.

4.2. References

Discuss with your faculty advisor(s) which citation style is appropriate for your field. Use that style consistently throughout your thesis. All in-text citations used throughout your thesis must appear on the References page. For some citation styles, each entry is numbered, and each number corresponds with an in-text citation. Other citation styles do not require numbering.

Each reference entry must be single spaced and have a double-spaced line in between each entry (HINT: Single space this entire page and hit return twice in between each entry. If you are using a citation software that links to Word, you can also automate the formatting. Contact us if you need help.)

The references you list on this page are for in-text citations used in this manuscript only.
5. TITLE ASSOCIATED WITH FOURTH JOURNAL MANUSCRIPT

(OPTIONAL)

5.1. Subheading 1 (optional, can add/remove as needed)

Another paragraph starts here.

5.2. References

Discuss with your faculty advisor(s) which citation style is appropriate for your field. Use that style consistently throughout your thesis. All in-text citations used throughout your thesis must appear on the References page. For some citation styles, each entry is numbered, and each number corresponds with an in-text citation. Other citation styles do not require numbering.

Each reference entry must be single spaced and have a double-spaced line in between each entry (HINT: Single space this entire page and hit return twice in between each entry. If you are using a citation software that links to Word, you can also automate the formatting. Contact us if you need help.)

The references you list on this page are for in-text citations used in this manuscript only.
6. CONCLUSION

6.1. Subheading 1 (optional, can add/remove as needed – place in Table of Contents if used)

Another paragraph starts here.

*No references in Conclusion*
