**FOUNDATIONS OF CONTINUED UNDERGRADUATE SUCCESS (FOCUS)** allows first-year students to build a foundation for a successful undergraduate experience. Participating in a **FOCUS** community each semester permits students to discover more about themselves as human beings. The In-**FOCUS** Sessions provide structure for this personal growth. **FOCUS** offers a learning community experience to **first-year students who are Regents' Scholarship recipients** in the College of Agriculture and Life Sciences, College of Veterinary Medicine, the Department of Biology in the College of Science, and the Texas A&M Health Science Center School of Public Health.

The **FOCUS** Learning Community will challenge ANSC Scholars and prepare them to be competitive graduate or professional school applicants. Students in the Borlaug Community will participate in activities relating to agribusiness, livestock education and production, take part in community service events and view film screenings.
