 - * CHEM 102 and 112
 - **FOCUS** Learning Community students must reside in Moses Hall
 - **Application must be submitted by May 10, 2016**
- *<http://tx.ag/PreMedScholars>

FOUNDATIONS OF CONTINUED UNDERGRADUATE SUCCESS (FOCUS) allows first-year students to build a foundation for a successful undergraduate experience. Participating in a **FOCUS** community each semester permits students to discover more about themselves as human beings. The In-**FOCUS** Sessions provide structure for this personal growth. **FOCUS** offers a learning community experience to **first-year students who are Regents' Scholarship recipients** in the College of Agriculture and Life Sciences, College of Veterinary Medicine, the Department of Biology in the College of Science, and the Texas A&M Health Science Center School of Public Health.

The **FOCUS** Learning Community will challenge Pre-Med Scholars and prepare them to be competitive medical school applicants. This track allows the Huang Pre-Med Scholars to enjoy medically-relevant speakers, guidance for the medical school application, teambuilding, shadowing and a suture clinic.
